PERSONAL PROJECTS

Substance Abuse Awareness Website -
www.bmoresafe.online
(October 2019)

Developed a website that has a game targeted to the youth that teaches them the dangers of substance abuse. Programmed using RenJS to build the game and the website built with HTML and CSS and Javascript.

Backend developer - BizClout
(September 2019)

Designed the back end of a web based service linking up various organizations to YouTube influencers. The website was able to take in information from organizations including location, type, and product in order to match with similar Youtube influencers. Used Python for the backend and implemented Google Cloud Platform's Machine Learning API to setup the brand to Youtube influencer matching algorithm.

App Developer - Skan
(August 2019)

Designed a basic android app using the Android IDE with Java framework that displays areas prone to cyclones and nearest safe places using the NASA API for disaster.

ABOUT ME

I am currently a student at the University of Waterloo enrolled in the Bachelor of Computing and Financial Management program. I am interested in web and app development.
