Education

University of Waterloo, Waterloo, ON
Candidate for Bachelor of Computing and Financial Mangement
September 2019 - Present

Projects

BMoreSafe - Frontend Developer (October 2019)
- Developed website with a game targeting the youth that teaches them the dangers of substance abuse using RenJs
- Built the frontend of the website with HTML, CSS and Javascript.

BizClout - Backend Developer (September 2019)
- Programmed the back end of a web based service linking up various organizations to YouTube influencers.
- Used Python for the backend and implemented Google Cloud Platform's Machine Learning API to setup the brand to the Youtube influencer matching algorithm.

Skan - App Developer (August 2019)
- Designed an Android app using the Android Studio IDE with Java framework that displays areas prone to cyclones and safe places nearby using the NASA API for disaster.

About Me

Learner | Enthusiast | Problem Solver
- 2nd year Computer Science & Finance student at UWaterloo.
- Worked on 4-5 projects involving the usage of a variety of frontend and backend languages.
- Passionate about all things technology and a music hobbyist.
- Love to solve problems in creative ways and always eager to learn.
